## Symposium: 肝腫瘤影像診斷與消融治療的挑戰

## Challenge of Liver Tumor Image Diagnosis and Ablation

Although there are many advances in liver tumor diagnosis and ablation, some issues remain challenge in terms of risk of HCC, difficulty in image diagnosis and ablation. In this symposium, we would like to introduce the update knowledge of these issues, particularly NAFLD, liver fibrosis and comparison among ablation algorithms including non-touch multi-electrodes RFA, MWA and liver metastasis.
